FIXATIVE INSTRUCTIONS - To permanently secure toner to clear polyester labels a high quality gloss art fixative is recommended.

- 1) Place surface to be sprayed in a flat position after printing and label has cooled.
- 2) Hold can at a 45 degree angle 12 to 14 inches above the Classic Studio polyester label.
- 3) Spray from side to side starting at the bottom overlapping each stroke and proceed to the top.
- 4) Keep can in constant motion while spraying starting and stopping each stroke off the sheet
- 5) Apply a light damp even coating.
- 6) When dry, if not perfectly fixed, turn sheet 45 degrees and spray as before. A rough cut out mask may well be employed for spot fixative
